SEMINAR ANNOUNCEMENT

Speaker: **Hüseyin Şirin HÜSEYİN**

(ATILIM University)

Differential Equations and Elementary Functions

In this talk, we indicate how the existence-uniqueness theorem for differential equations can be used to define some elementary functions and how we can use this to derive properties of these functions.

DATE: October 08, 2008

TIME: 15:45

PLACE: FEF 223 (Seminar Room)

All interested people are cordially invited. After the seminar, some cookies and soft drinks will be served.
