DEPARTMENT of MATHEMATICS

SEMINAR ANNOUNCEMENT

Speaker: **Hürevren Kılıç**

(ATILIM University)

Agent paradigm is becoming a dominating abstraction driving the latest development on computational sciences and engineering. In this talk, the spectrum ranging from the early abstract computing machine viewpoint to today's distributed multi-agent environment settings will be considered and speculated on. The goal of the presentation is to contribute to shortening the gap between theory and practice of computation by a new questionable means: Agents.

DATE: May 14, 2008

TIME: 15:45

PLACE: FEF 223 (Seminar Room)

All interested people are cordially invited. After the seminar, some cookies and soft drinks will be served.
