SCHOOL OF
MEDICINE

With our School of Medicine that facilitates access to information with its contemporary approach in education, and our dynamic academic staff to increase day by day, and our different curriculum, we aim to train doctors who hold a biopsychosocial holistic approach throughout, by offering our students the basic scientific courses, and introducing them to clinics from their freshman year.

At the Atılım University School of Medicine where we train the doctors of the future, our prospective doctors gain a multidisciplinary approach with the anatomy dissection laboratory,

the multidisciplinary laboratory, the histology and pathology laboratory and the simulated patient laboratories,

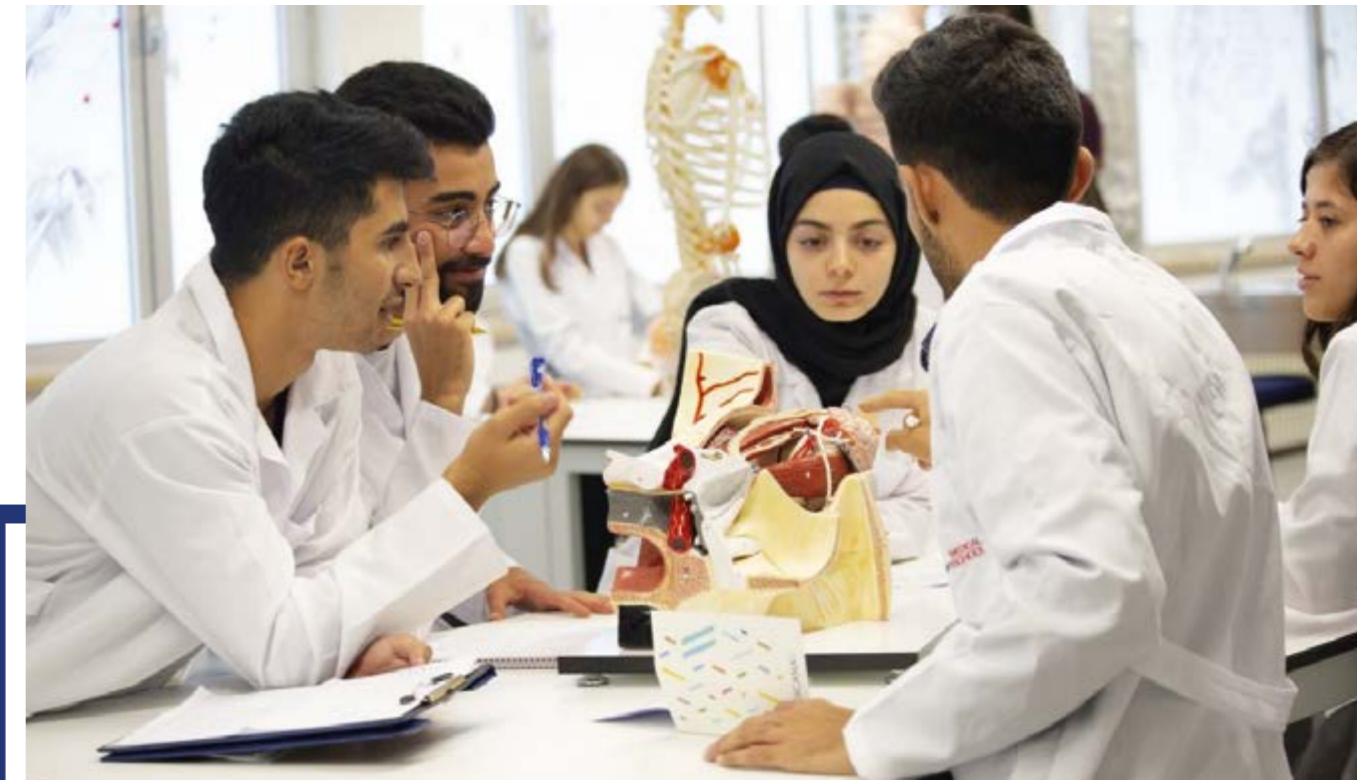

all furnished with state-of-the-art technologies, as well as the support granted by our University for research projects.

Acting selectively in terms of student admission, our School of Medicine aims to be in direct contact with our students and trace their cognitive and psychosocial developments to train them to become successful medical professionals of the future in this regard.

Our future medical professionals to attend school within our campus will also have the chance to benefit from the opportunities in place at our university from a social standpoint, and be able to take part in cooperative studies with other schools, such as our School of Engineering. In

addition to the opportunity to take part in certain certification programs, our students will gain skills in the ascending fields of the future, such as biomedical, and have the opportunity to work in the health care industry during their studies.

Within the framework of the protocol signed with the Medicana International Ankara Hospital, one of the top hospitals in Turkey, our students will complete their practice sessions, clinical training, internship studies and patient care training, as well as their education, at the Medicana International Ankara Hospital.

In addition to these opportunities, our future medical professionals have the option to prepare for international expertise exams such as TUS, USMLE and FLEX, with the privileged preparatory program of the Atılım University School of Medicine. Furthermore, our students gain the vision of becoming inquisitive scientists, individuals the importance of whom is better acknowledged today.
