

CLINICAL PSYCHOLOGY GRADUATE PROGRAM

(non-thesis)

ATILIM UNIVERSITY

Program Overview

- Master of Clinical Psychology Program of Atılım University aims at providing an education and professional training based on the scope of the international professional standards.

<https://www.atilim.edu.tr/en/klinik-psikoloji-ana-bilim-dali>

Scope of Clinical Psychology

- According to the widely accepted standards, Clinical psychology is
- A science-based profession that integrates theory and clinical practice to understand, prevent, and relieve psychological problems or disorders whether they are mild, moderate, severe, chronic, or complex. (ACPA, <https://acpa.org.au/what-is-a-clinical-psychologist/>).
- A field of practice that deals with human functioning; either human problems and their solution, as well as with the promotion of physical, mental, and social well-being. (CPA, <https://cpa.ca/sections/clinicalpsychology/>).
- The psychological specialty that provides continuing and comprehensive mental and behavioral health care for individuals and families; consultation to agencies and communities; training, education and supervision; and research-based practice. It is a specialty in breadth — one that is broadly inclusive of severe psychopathology — and marked by comprehensiveness and integration of knowledge and skill from a broad array of disciplines within and outside of psychology proper.
- The scope of clinical psychology encompasses all ages, multiple diversities and varied systems (APA, <https://www.apa.org/ed/graduate/specialize/clinical>)

Four Procedures for Clinical psychologists

Clinical psychologists are expected to be able to follow these four procedures specific to their specialty:

- **Assessment** (diagnostic interviewing, behavioral assessment, administration and interpretation of psychological test measures)
- **Intervention** (primary, secondary and tertiary levels): clinical services to individuals, families and groups.)
- **Consultation** (inter- and intra-professional practice with other health and behavioral health professionals and organizations)
- **Research** (engagement with specific research and critical review of science, knowledge and methods pertaining to clinical psychology)
(APA, <https://www.apa.org/ed/graduate/specialize/clinical>).

Competencies

Graduates of Master of Clinical Psychology Program are expected to be competent at;

- Knowledge on psychopathology, diagnosis, identification and intervention.
- Knowledge on lifelong psychological health and disorders which depends on solid knowledge on psychopathology.
- Knowledge on and skills related to application of psychological tests, grading, reporting and integrating and synthesizing their results with other personality tests.
- Knowledge on and skills related to cooperation with other mental health professionals and institutions, consultation and guidance in cases of severe mental disorders.
- Knowledge on and skills related to conducting research and critical thinking and evaluation about scientific research in clinical psychology.

Duration of study

- Three semesters,
- 4 compulsory courses
- 6 elective courses
- Graduation Research Project
- Field practice and supervision, 1 semester, 28 hours a week, supervised clinical practice at an department approved institution.
