CHAIRMAN'S MESSAGE

As a member of a family proud of serving for education, I dreamed of establishing a university which provides quality education, produces science and technology, conducts research and enlightens and contributes to the future of our country. Leaving 22 years behind with achievements despite challenges, Atılım University will continue conducting its activities in line with the same purpose and target.

Although the number of universities has been on the rise in Turkey recently, current conditions show that the need for quality universities will prevail both today and in the future. A university should be able to interpret contemporary world, its environment and country, and enlighten the public with its global vision. Turkey has leadership potential in the region thanks to the quantity and quality of its labor force and underground and overground wealth. Responsibility of universities in the development and progress of our country is to attach importance to scientific and technological improvement in every condition and era.

Projects based on university-industry collaboration must be given utmost importance in order to create products with high added value by supporting technological developments and industries with scientific wealth generated at our University.

The quantity and quality of the laboratories and research centers of our University are source of proud for us and our valuable academicians are able to carry out their studies in these research sites effectively.

Atılım University has proven its quality by involving in international rankings, based on various criteria notably research studies, in the last three years. Atılım University ranks among the top four Turkish foundation universities. In 2017, we ranked among the top 100 universities in the world in THE Young University Rankings. In addition, we managed to become one of the top two Turkish universities by ranking in 301-400 range in THE Physical Sciences rankings. Managing to be involved in Global Universities Ranking by U.S. News in 2017 along with other 38 Turkish Universities, Atılım University ranked 87th in mathematics field and became the only Turkish University in this field. Additionally, with international students from 58 countries, our University ranks 332nd among 500 big service exporters and 7th among Turkish foundation universities in 2017.

Atılım will continue serving our country with its cultural, social and scientific values, all internal and external stakeholders including students, graduates, academic and administrative staff, technological opportunities and nature-friendly campus without compromising from its objectives regarding education and research.

Yalçın Zaim
Chairman of the Board of Trustees

PRESIDENT'S MESSAGE

Since its foundation in 1996, Atılım University has both strengthened its substructure and made a huge progress by taking a leading role in the fields of education and research.

In various international rankings, our university has managed to rank among the top 4 Turkish foundation universities, top 1000 universities around the world and top 150 universities in emerging countries. Atılım University advanced to 13th place from 26th within two years in "Intercollegiate Entrepreneurship and Innovation Index" prepared by the Ministry of Science, Industry and Technology.

We all know that the world is developing and changing at a frightening pace. Globalization and competition increase day by day. In such circumstances, our fundamental duty is to carry the University one step further being hungry for success all the time. Atılım University is determined to become a prestigious research institution beyond giving quality education. In this respect, the University urges both students and instructors to take part in research activities at its laboratories, research centers, Technology Transfer Office and Incubation Center. Rapidly developing and increasing master's and PhD programs will advance the research outputs of our University which will spread on effort to become a world university in line with our internationalization target.

Moreover, Atılım University is also in the pursuit of progress in undergraduate education. Following the foundation of the School of Health Sciences in 2017, we have received all necessary permissions for the establishment of the School of Medicine this year. Atılım projects to admit students in the School of Medicine in 2019-2020 academic year. In this context, it is one of our most important targets to transfer fast-growing technology and health research to our University and create a strong and rich research substructure.

Atılım University will strive to take its rightful place in the international arena with publication and initiation of the Strategic Plan covering 2018-2023. We, all members of Atılım University, will collaborate in order to sustain our vision: to always rank in top 10 in Turkey and top 500 in the world.

I would like to extend my deepest gratitude to all members serving to Atılım University in the past and present and especially to the Chairman of the Board of Trustees, Yalçın Zaim.

Sincerely yours.

Prof. Dr. M. Yıldırım Üçtuğ
President

1997
Foundation of the Schools of Arts&Sciences, Engineering and Business

First Graduates from the Schools of Arts&Sciences, Engineering and Business

2003
Foundation of School of Law

Combined experience with dynamism.

2006
Initiation of Strategic Plan

Aimed for the sky for a brighter future.

2009
4th University in Turkey with most engineering departments including Energy Systems, Automotive, Chemical Engineering and Applied Chemistry

Established engineering of the future at Atılım.

2013
Launch of Kadriye Zaim Library

Established Kadriye Zaim Library with young, dynamic and expert staff, high-tech substructure and comfortable areas of usage.

2017
Reached 150 Educational and Research Laboratories

Became 3rd generation university that teaches, searches, produces and takes patents.

Atılım's Progress Over the Years

2016
Launch of Atılım Aviation Training Center

Atılım in International Rankings

Ranked among the top 500 Universities in the world.

2010
Launch of MFCE

Founded the FIRST Metal Forming Center of Excellence in Turkey

Launch of School of Civil Aviation

Launched the School of Civil Aviation being inspired from "The Future is in the Sky"

Why do we need Rankings?

Foundation date of the oldest university in the world is not known exactly. Bologna University, founded in the Europe in 1088, University of Santo Tomas, founded in the Asia in 1611, Harvard University, founded in the USA in 1636 and Sydney University, founded in 1850 in the Australia are accepted as the oldest universities in their region. The number of universities has reached thousands since then. Abundance of universities necessitated evaluation and ranking of universities for prospective students, parents, academicians and even investors. The first ranking was published in 2003, and then the number of organizations interested in ranking universities has increased.

In the globalizing world, the concepts of quality and performance have become popular and this have required universities to present their own assets and adopt a quality culture in a competitive environment. In parallel with these developments, university rankings were started on the basis of various criteria. In the recent years, various organizations evaluate and rank universities according to different variables such as academic achievement, quality of education, student satisfaction, number of research studies, web performance, number of publications, number of students per academician, campus standards, admission conditions, ease of employment after graduation and salary.

Ranking Organizations

- Time Higher Education (England)
- Quacquarelli Symonds (England)
- Academic Ranking of Universities (China)
- Leiden Rankings (The Netherlands)
- Round Ranking (Russia)
- National Taiwan University (Taiwan)
- Scimago Institutions Rankings (Spain)
- The Center for World University Rankings (United Arab Emirates)
- URAP Ranking (Turkey)
- US News Rankings (USA)
- Webometrics Rankings (Spain)

Ranking Criteria

- RESEARCH
- EDUCATION
- INTERNATIONALIZATION
- INDUSTRIAL COOPERATION

RESEARCH AT ATILIM

- The research policies of Atılım University have been designated in line with its vision “ranking among the top 10 Turkish universities and top 500 universities around the world in the fields of research and education”.
- Atılım University, consisting of 7 schools, carries out research studies in almost every fields from Science and Engineering Sciences to Social Sciences, from Health Sciences to Architecture and Design.
- Atılım’s Metal Forming Center of Excellence is the first and only research center in Turkey in the field of metal forming.
- Articles written by our academic staff are published in prestigious international journals.
- Our academic staff carry out joint projects with public and private institutions such as ASELSAN, FNSS and TAI.
- Atılım Research Day (ATAG) was organized in May 2018 for the first time in order to share the results of research studies carried out by our undergraduate and graduate students within the last academic year and to create a sustainable research environment at our University. Atılım Research Day will be organized in every May.

UNDERGRADUATE RESEARCH

- Atılım University is one of the prominent universities which involve and encourage undergraduate students in research studies.
- In 2011, Undergraduate Research Projects (LAP) Program was developed in order to create a widespread undergraduate research culture, train inquisitive and creative students at the University in accordance with the strategic plan and vision of Atılım University.
- Undergraduate research projects which continue for one academic year can be carried out within the scope of university-industry cooperation.

Education at Atılım

Accreditations and Memberships

MUDEK

8 out of 13 engineering programs of Atılım University were accredited by Association for Evaluation and Accreditation of Engineering Programs (MUDEK) which focuses on accreditation, evaluation and information services for engineering education programs in different disciplines.

FEDEK

Known as a quality assurance organization by the Council of Higher Education, FEDEK (Science, Literature, Faculty of Science and Letters, Faculty of Languages, History and Geography Curriculum Programs Assessment and Accreditation Association) accredited Translation and Interpretation Undergraduate Program on 28 January 2017 for 5 years as a result of the general evaluation process.

SCHOOL OF ENGINEERING	VALIDITY PERIOD OF MUDEK ACCREDITATION	VALIDITY PERIOD OF EUR-ACE LABEL
Computer Engineering (English)	01.05.2014-30.09.2019	01.05.2014-30.09.2019
Electrical & Electronics Engineering (English)	01.05.2014-30.09.2019	01.05.2014-30.09.2019
Industrial Engineering (English)	01.05.2014-30.09.2019	01.05.2014-30.09.2019

ELFA

Membership of our School of Law was approved by the European Law Faculties Association (ELFA) in the General Assembly held in Brno, Czech Republic between 19-21 April 2017.

PEARSON ASSURED

The School of Foreign Languages was accredited for one year by Pearson Assured which is an internationally-recognized quality assurance and accreditation system developed by Pearson, the largest educational solutions company.

International Students

Atilm University embraces different cultures in its campus with students from 63 students.

We support development of our students with international exchange programs such as Erasmus+ and MoU. More than fifty students had study abroad experience last year thanks to our agreements with 77 universities from more than 30 countries. The university aims to increase the number of contracted universities and programs.

International Atılım

Erasmus

Launched on 01 January 2014, Erasmus+ is a comprehensive program which supports different age and target groups in the fields of education, youth and sports. The program continues to support existing fields such as secondary school education, higher education, vocational education, adult education and youth, and provides financial support to sports projects.

Atılım University is entitled to have Erasmus Charter for Higher Education Institutions between 2014 - 2020 with TR ANKARA05 Erasmus Code. By this Charter, it is declared that the University accepts all principles of the European Commission.

Atılım University has concluded Erasmus+ agreements with more than 80 countries from more than 30 countries. Thanks to these agreements, our students have an opportunity to recognize different educational systems and institutions in many European countries.

Metal Forming Center of Excellence

Metal Forming Center of Excellence

On 9 April 2010, the Center was launched with machine&equipment support of State Planning Agency and infrastructure support (building/facilities) of Atılım University.

The Center aims to support the Turkish metal forming industry through applied research, develop innovative, knowledge-based manufacturing technologies, manufacture high value-added components and form new and advanced materials.

The center conducts research in close collaboration with both academia and industry. Since 2010, the Center has worked on a significant number of a national and international, small and medium-sized projects. It undertakes important roles in the dissemination of knowledge through organizing seminars, workshops, training courses and ongoing projects.

The center has necessary hardware and software opportunities for metal forming research. The rich infrastructure of the Center contains forming presses, testing devices for material and micro-structure characterization, and necessary software and hardware for numerical analysis.

Working Fields of MFCE

- Material Characterization for Simulation
- Forming Light Materials
- Die Design and Lifetime Improvement
- Analytical Methods
- Numeric Methods
- Material Characterization Experiments
- Systematic Experiments
- Prototype Production
- Pre-mass Production

Turkish Metal Industry is in need of a research and development center which has the expertise to address the short, medium and long term problems of the industry in a way to maintain its competitive power and even increase it for the next two decades, to discover new markets and products, and to be among global leaders of technology. In this context, the fundamental aim of Metal Forming Center of Excellence is to develop academia-industry collaboration based on necessary research and development to:

- Develop manufacturing technologies based on scientific knowledge
- Fabricate products which have high added value
- Use new and advanced materials in the manufacturing technologies
- Increase productivity
- Develop small and micron sized products
- Carry out necessary research and development activities to generate products at a rapid pace and increasing innovation capacities.

Launched with the support of the Department of Manufacturing Engineering, Atılım University, the Center gives support to the researchers of the University in industry-partnered projects.

Services

PROJECT

Our Center carries out R&D projects for the industry as well as academic institutions and provides support for any studies on materials and forming methods that involve advanced machinery, laboratories, software substructure and, above all, experts in the field.

COUNSELING

With its counseling services to organizations in the industry, the center uses information-based applications which yield actual results instead of trial and error which is likely to increase costs and expenditures.

EDUCATION

The Center offers both theoretical and applied training to organizations and institutions, either at their workplace or at center itself, using its own material.

TEST/ANALYSIS

The tests required for the R&D projects of organizations and institutions are conducted at the Center and the results are reported back to those organizations.

PROTOTYPE / PRE-MASS PRODUCTION

We help production of designs of all organizations and institutions with our quality manufacturing substructure and staff.

İş birliklerimiz

- ASSAN

The center has provided services to other companies and universities, as well.

By utilizing abovelisted facilities of the MFCE, academicians and industrialist can:

1. Receive support as service procurement for TUBITAK science projects;
2. Receive support as service procurement for TEYDEB projects;
3. Receive support as service procurement for SANTEZ projects;
4. Receive support as service procurement for EU projects;
5. Give training to companies;
6. Manufacture prototypes for companies;
7. Make pre-mass production for companies;
8. Carry out finite element analysis and structural analysis;
9. Carry out metal forming, heat treatment-welding and develop simulations for specific cases;
10. Make computer aided design (CAD) for companies.

The Center prepares a plan and protocol covering intellectual property rights for the companies to cooperate with. Experimental studies will be carried out under the supervision of MFCE experts.

Services of MFCE

- Mechanical Tests for Materials
- Tensile, compression, hardness test, bulge test, forming limit diagram - FLD, cup drawing and earing tests, friction characterization, springback test mechanisms after draw and non-draw bending,
- Mechanic characterization in high temperature and strain rate (with forming dilatometer and Gleeble physical simulator).
- Residual stress analyses - with XRD and perforation method.
- Scanning Electron Microscopy (SEM) examinations, fracture surface analysis, damage analysis, high-definition (~2nm) micro-structure analysis, point chemical analysis, chemical mapping, examination of insulating, wet and biological samples by means of its changing vacuum feature.
- Reverse engineering by means of optical measurement with GOM-ATOS, heading distribution and geometry measurement after forming by means of GOM-ARGUS system, high-speed digital analysis and characterization through thermal camera, Photron Fastcam SA-X2, digital transformation measurement during forming by means of GOM-ARAMIS.

Project Counseling, Patent and Publications

Projects

In line with its strategic plan, Atılım University initiated various internal support programs in order to develop the research environment at the University and provide necessary substructure support required to take research supports/grants from TÜBİTAK, the EU and other granting organizations. The programs are updated in accordance with changing needs.

100 projects were supported between 2013 and 2017 within the scope of internal support programs. 83 of them are undergraduate research projects and 17 are scientific research projects.

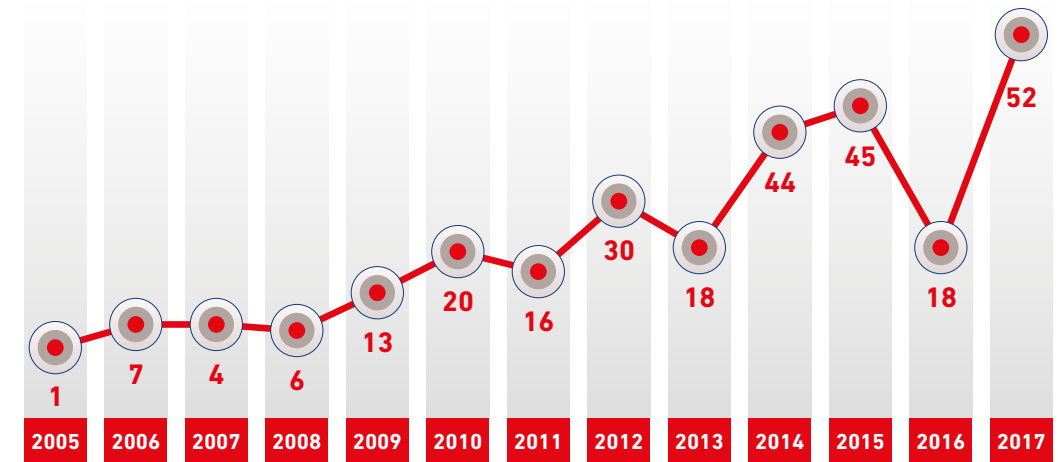

Researchers of Atılım University also carry out projects which are supported by TÜBİTAK, ASEL SAN, FNSS, etc.

Publications

Atılım University aims for publication of scientific research products in high impact journals bearing international prestige. The total number of documents published within the scope of Web of Science since the foundation of the University is 2312 including 1910 scientific papers (as of January 2019). Total number of citations from Web of Science documents is 19673 and average number of citations per document is 8.51.

Number of papers in Web of Science (as of January 2019)

Number of citations to WoS indexed publications (as of January 2019)

Atılım University's Place in Rankings

Founded in 1996, Atılım University is one of the oldest foundation universities in Turkey. While the number of foundation universities in Turkey was not more than 10 when Atılım University was founded, there are more than 80 foundation universities today. Atılım University have gained significant achievements in national and international rankings on the way to become a global university by carrying out academic research studies and social activities, and making R&D investments for 22 years. As of December 2018, Atılım University ranks among the top 4 Turkish foundation universities in World Universities Rankings prepared by Times Higher Education (THE), an English ranking organization. Details about current rankings of Atılım University are given below.

Times Higher Education (THE)

THE ranks universities on the basis of below listed criteria. Some information regarding the rankings are obtained from universities.

- Education 30%
- Research 30%
- Citation 30%
- Industrial Income 2.5%
- Internationalization 7.5%
