

Dear students,

As you know, the education at our university has progressed in a partially formal manner during the Fall of 2020-2021. The notice from the Ministry of Internal Affairs in line with the resolutions reached at the Presidential Cabinet within the scope of the measures against Covid-19, dated 18.11.2020, maintains that individuals under the age 20 (those born after 01.01.2001) are to be subject to a curfew. However, "university students attending formal education and able to document their status as such" are not in the scope of such restrictions as per Paragraph 5 of Article C of the Resolution by the Provincial Board of General Health under Ankara Governorship Provincial Directorate of Health dated 18.11.2020, no. 2020/82.

In line with the aforementioned resolution by the Provincial Board of General Health under Ankara Governorship Provincial Directorate of Health, it has been decided that the education at our university shall progress as is.

Our students under the age of 20 may come to the university on the condition that they carry this notice and their student identification cards, as well as that they are able to present these documents where required.
