

MED 320	Evolutionary Medicine Instructors: Prof. Dr. Yekbun Adigüzel
WEEKS-HOURS	TOPICS
26 January 2023 13:30-15:20	Evolutionary theory & The molecular basis of variation and inheritance (to be presented by students, classroom 331)
2 February 2023 13:30-15:20	Evolution and development & Evolution of life histories (to be presented by students, classroom 331)
9 February 2023 13:30-15:20	Human evolution and the origins of human diversity & Reproduction (to be presented by students, classroom 331)
16 February 2023 13:30-15:20	Nutritional and metabolic adaptation & Defence (to be presented by students, classroom 331)
23 February 2023 13:30-15:20	Social organization and behaviour & Evolutionary principles applied to medical practice (to be presented by students, classroom 331)
2 March 2023 13:30-15:20	Is Neonatal Jaundice a Disease or an Adaptive Process? & Infant Crying Behavior and Colic: An Interpretation in Evolutionary Perspective (to be presented by students, classroom 331)
9 March 2023 13:30-15:20	Breastfeeding and Mother-Infant Cosleeping in Relation to SIDS Prevention & Otitis Media: An Evolutionary Perspective (to be presented by students, classroom 331)
23 March 2023 13:30-15:20	The Evolutionary Ecology of Childhood Asthma & Evolutionary Perspectives on the Onset of Puberty (to be presented by students, classroom 331)
30 March 2023 13:30-15:20	Incest Avoidance: Clinical Implications of the Evolutionary Perspective & Evolutionary Obstetrics (to be presented by students, classroom 331)
6 April 2023 13:30-15:20	Darwinian Medicine and the Emergence of Allergy & Using Evolution as a Tool for Controlling Infectious Diseases (to be presented by students, classroom 331)
13 April 2023 13:30-15:20	Evolutionary Control of HIV and Other Sexually Transmitted Viruses & Paleolithic Nutrition Revisited (to be presented by students, classroom 331)
20 April 2023 13:30-15:20	Human Evolution, Low Back Pain, and Dual-Level Control & What Darwinian Medicine Offers Psychiatry (to be presented by students, classroom 331)
27 April 2023 13:30-15:20	Evolution, Substance Abuse, and Addiction & Menopause in Evolutionary Perspective (to be presented by students, classroom 331)
4 May 2023 13:30-15:20	Breast Cancer in Evolutionary Context & Evolutionary Perspectives on Chronic Degenerative Diseases (to be presented by students, classroom 331)
